

Q-Match®

Making the perfect match: Customised solutions

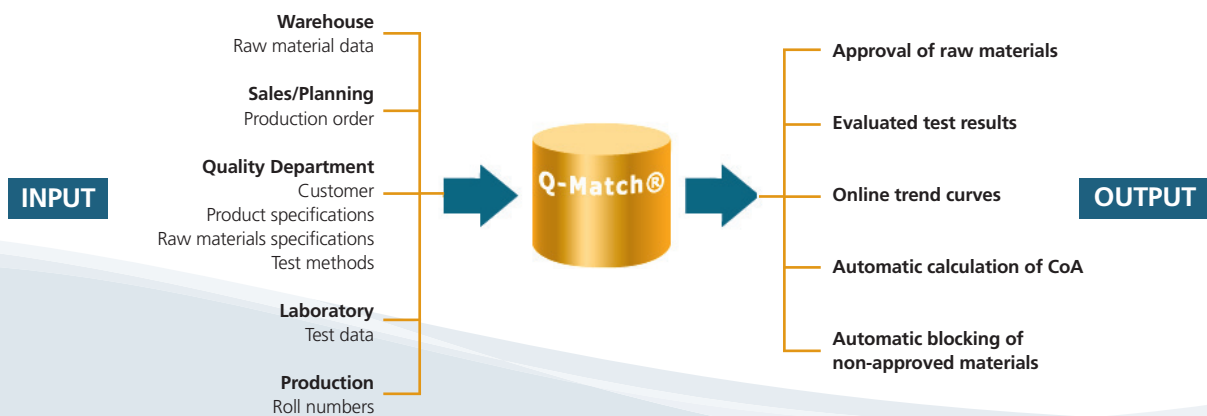

What's good for our customers is important to Fibertex

Q-Match is a digitally integrated quality management system implemented throughout the Fibertex Group. It is initiated at order registration. Throughout the entire production process the system provides instant electronic control of product quality and process capability according to customers' specifications. Q-Match contributes to improved and uniform quality minimising errors and waste. Better for the environment – and for our customers.

Some advantages

- 100% digital interaction between planning tool, ERP system, quality assurance and test database
- Raw material approval by electronic comparison with supplier specifications
- Automatic product surveillance with continuous evaluation of test data against product specifications
- Calculation of statistical values during production
- Online visualisation of product characteristics by trend curves.
- Only approved material can be scanned out for shipment
