

QUALITY ASSURANCE AND LABORATORY TECHNICIAN

We are on the lookout for an individual who demonstrates passion for quality assurance and takes a keen interest in the attention to detail of laboratory testing.

Our newest member to our growing QA and Lab team will be responsible for servicing enquiries from all divisions of our business and form part of an innovative operations team that understands the importance of supplying on time with the best quality that speaks to our global standards.

Deliverance in our operations team is second nature. We require an independent thinker that is able to grasp onto processes quickly and demonstrates a clear understating of a manufacturing environment.

As a Quality Assurance (Q.A) and Lab Technician you will fulfil our internal mantra of collaboration, respect, openness, clear communication and it goes without saying . . . **fulfilling our business goals**. Your ability to prioritise enquiries and deal with the unpredictability of influx of requests whilst servicing the different divisions will be your key to success.

A guideline of your daily tasks will include:

- Daily testing and final inspections – process testing and verification to ensure product conformity that meets customer standards.
- Nonwoven product testing, interpreting of information and data analysis.
- Reporting inconsistencies and deviations from the quality standard.
- Generating of certifications such as COA's for nonwoven and fibre extrusion lines.
- Ensure that ISO 9000 QMS standards are met and maintained and the necessary teams are well informed of requirements and audits.
- ISO QMS document control.
- Work closely with production team in terms of quality requirements and assist with data required for making the necessary changes for processing.
- Maintain product specifications according to ISO9000 requirements.
- Movement of trial rolls with the use of a forklift for compiling rolls for product development.
- Assisting with new product developments and product improvements.
- Assist with Health and Safety compliance, audits, and maintenance of fire equipment and first aid boxes.

Qualifications and Experience

- Diploma or equivalent in Textile Technology.
- 3 – 5 Years in the nonwoven manufacturing industry and geosynthetic products or similar.
- Staple fibre extrusion knowledge would be advantageous.
- Experience with ISO9000 and ISO14001 requirements and knowledge would be advantageous.
- Forklift license and/or ability to drive a forklift.
- Proficient in Microsoft word and excel.
- Experience and understanding with XAL/AX system or similar ERP system such as SAP.

Our ideal candidate

You can be described as a patient person who accepts that some days will be busier than others will and you maximise on your ability to be effective in this way. You are tolerant and trusting of the process, you have the ability to work through enquiries or requests that come in your direction. Openness with a hunger to learn, curiosity and being an extrovert is your biggest strength. You maintain maturity and a level head when working under pressure.

You have a friendly, respectful personality that is welcoming and you take a keen interest in getting to know people from different divisions with different needs. You are flexible and can relate to others when it comes to new perspectives, ideas and suggestions for improvements.

Preferably, you reside in Hammarsdale/Cato Ridge/Pinetown/Kloof or Hillcrest area and have reliable transport.

More about us

We are business that continuously strives to improve. Change, growth and development is our only constant. We do this by remaining open to each other through curiosity, support, understanding and encouragement. As a team, we envision to be each other's greatest cheerleaders. We prefer to unlock and enable individual strengths with an aim to have our people activated to be the best version of themselves. Thereon we watch the possibilities unfold as we strive to uphold our global motto of "Results are created by People".

Are you keen on joining a team that contributes to global success? Please go ahead and apply. Our People Department will take it from there. All the best!
