

Household Cleaning Wipes

Sustainable, durable and highly effective wipes ensure effortless surface cleaning.

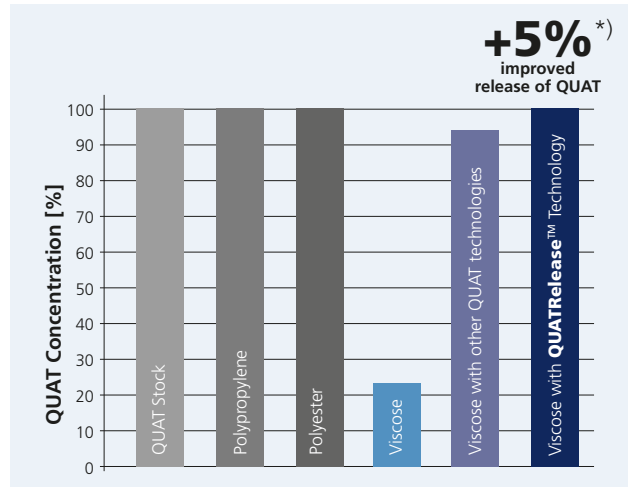

Ensuring a healthy and welcoming environment for family and friends is important in our daily lives. Fibertex' quality nonwoven materials are designed for effortless surface cleaning, from counters to floors.

Wipes are perfect for preparing for guests, cleaning up daily spills, or to eliminate germs from every room in the home. Regular surface cleaning creates a beautiful and healthy living space and for high efficiency, this task requires a durable and effective nonwoven material.

Value proposition

Fibertex household cleaning wipes work quickly and safely, making sure we get to spend more happy time with family and friends and less time cleaning up.

Household **Cleaning Wipes**

Solution

At Fibertex, we understand how important it is to keep our homes squeaky clean, which is why we take extra care to produce the finest nonwoven material for hygiene and cleanliness.

Household cleaning wipes, while convenient and popular, do have some challenges. Not all household disinfecting wipes are equally effective against all types of germs and spills and the world's single-use mentality drives manufacturers to develop more sustainable and biodegradable alternatives.

Therefore, the Fibertex team works closely with leading consumer and premium private label brands, to continually advance methods to create a clean and healthy environment. Fibertex manufactures nonwoven materials to help get the job done quickly and easily.

Sustainable benefits

Fibertex manufactures the widest range of performance-based nonwoven materials that are used in the manufacture of the toughest acting surface cleaning products.

- All our products are free of harmful chemicals, chlorine, binders or PFAS
- We support responsible design through use of biobased fibres (viscose and lyocell) recycled content (rPET) biobased polymer (PLA) and biodegradable polymer (BioPET)
- Our products meet stringent quality, safety and environmental standards, with full transparency through material declaration
- Ambitious Scope 1, 2 and 3 cradle-to-gate GHG emission reduction across global sites

*) Fibertex QUATRelease™ Technology secures a 5% improved release of Quat and thus a better cleaning experience with less chemicals needed to achieve the same efficacy.
