

Ultra-Premium Baby Diapers

Sustainable, soft and highly effective nonwovens for baby diapers gently make sure babies are clean, happy and healthy.

Fibertex's solutions for baby diapers are the safest and softest materials for maintaining infant wellness by keeping a baby's skin clean, dry and free from irritations. Caregivers use baby diapers manufactured from our high quality materials to tenderly keep babies clean and dry and enhance the infant's happiness, health and hygiene.

Value proposition

Ultra-Premium diapers are gentle, soft and safe, making sure caregivers get to enjoy the happiest moments with their babies.

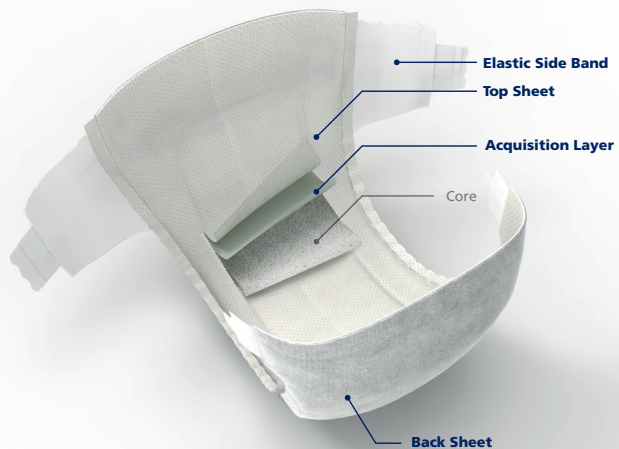

For the product components containing 100% cotton.

The Seal of Cotton is a trademark of Cotton Incorporated.

Ultra-Premium **Baby Diapers**

Solution

At Fibertex we understand how precious life is, which is why we take extra care to produce the finest nonwoven products for infants.

Baby diapers, while convenient and widely used, do have some challenges. Unsafe chemicals can cause irritation, rashes or allergic reactions to sensitive skin. Moreover, many products made from sustainable materials often compromise performance, resulting in negative user experience.

Therefore, the Fibertex team works closely with leading consumer and premium private label brands to continually advance infant health globally through effective design and manufacture of nonwovens for baby diapers. Our commitment to well-being is to produce gentle products that are clean, safe, and reliable for babies and the environment.

Sustainable benefits

Fibertex manufactures the widest range of performance-based nonwoven materials used in the manufacture of the safest and softest baby diapers.

- Award winning 100% cotton spunlace top sheet
- GOTS Organic Certified cotton available
- All diaper products are free of harmful chemicals, chlorine, binders or PFAS
- Adhere to stringent quality, safety and environmental standards with full material transparency
- Ambitious Scope 1, 2 and 3 cradle-to-gate GHG emissions reduction across global sites
