

Ultra-Premium Period Products

Sustainable, soft and highly effective nonwovens for period products advance women's health and empower an active lifestyle.

Fibertex's solutions for pads, liners and tampons are the safest and softest materials contributing to women's comfort by keeping their skin clean, dry and healthy. Women of all ages use period products manufactured from our high quality materials to maintain personal hygiene and enhance overall well-being and health.

Value proposition

Ultra-Premium period products advance women's health and wellness and empower an active lifestyle for women of all ages.

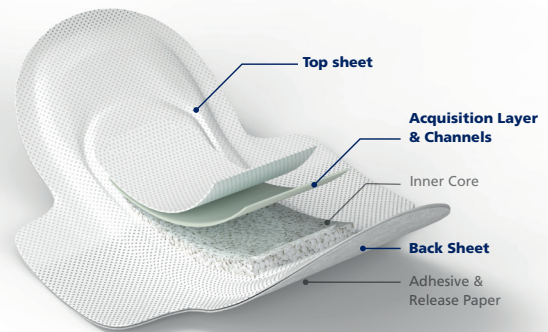

For the product components containing 100% cotton.

The Seal of Cotton is a trademark of Cotton Incorporated.

Ultra-Premium **Period Products**

Solution

At Fibertex we understand the importance of Freedom of Movement, which is why we take extra care to produce the finest nonwoven products for women.

Period products, while convenient and widely used, do have some challenges. Unsafe chemicals can cause irritation or allergic reactions to sensitive skin. Moreover, many products made from sustainable materials often compromise performance, resulting in negative user experiences.

Therefore, the Fibertex team works closely with leading consumer and premium private label brands to continually advance women's health globally through effective design and manufacture of nonwovens for period products. Our commitment to well-being is to produce gentle products that are clean, safe, and reliable for women and the environment.

Sustainable benefits

Fibertex manufactures the widest range of performance-based nonwoven materials used in the manufacture of the safest and softest period products.

- Award winning 100% cotton spunlace top sheet
- GOTS Organic Certified cotton available
- All period products are free of harmful chemicals, chlorine, binders or PFAS
- Adhere to stringent quality, safety and environmental standards with full material transparency
- Ambitious Scope 1, 2 and 3 cradle-to-gate GHG emissions reduction across global sites
